

The Paris Region Fellowship Programme **2020**

and the  **DIM
ELICIT**

The DIM ELICIT is the network of innovative technologies for biology in Île-de-France region

Through calls for proposals, this programme supports Paris region research teams to design or disseminate breakthrough technologies for first applications in biology. It stimulates interdisciplinary collaborations between technologists and biologists, as well as partnerships with industries.

These technological innovations must have a strong societal impact, particularly in the biomedical field, and generate scientific and economic value in the medium term.

Apply now to

The Paris Region Fellowship Programme (European co-fund)

The Paris Region Fellowship Programme (ParisRegionFP) is a EU co-funded Marie Skłodowska Curie Action (MSCA) in the frame of the European Commissions H2020 programme that will strengthen the research capacity and international influence of the Paris Region, in France

The first call will recruit 26 researchers for 2-year post-doctoral fellowships

→ Applicants must not have resided or carried out their main activity (work, studies) in France for more than 12 months in the last 3 years before deadline

→ Based on individual-driven mobility, applicants will freely choose a research topic and appropriate host organization/supervisor fitting their scientific interests

→ Applicants must search and contact the most suitable host organization to discuss a potential cooperation and the research project

→ No other restrictions are implemented, like age or nationality, the Paris Region applies strict equal opportunity principles for applicants' selection

If your subject of research belongs to the DIM ELICIT core technologies (Microfluidics, Biophotonics and waves, Image analysis) or end-user applications (Single cell/single molecule, Organs-on-chips, Technologies for in vivo biology on animal models, High Tech/Low Cost technologies) → you are eligible !
